

Olympic Winter Games Beijing 2022

Subsequently to the successful hosting of the 29th Olympic Summer Games in 2008, Beijing will once again usher in a world-renowned Olympic event in 2022 - the 24th Olympic Winter Games, which enables Beijing the first “Dual-Olympics” city in the world. The Olympic Winter Games Beijing 2022 will be held from February 4 to 20, 2022. There will be 109 individual events in 7 sports and 15 disciplines and the competitions will be distributed in 3 competition zones: Beijing, Yanqing and Zhangjiakou.

As a famous historical city in China, Beijing has countless places of interest and cultural sights. During the Olympic Winter Games 2022, Beijing will host competitions for short track speed skating, figure skating, speed skating, ice hockey, curling, freestyle skiing and snowboard; Yanqing, a district in 80 kilometers northwest of Beijing, is a place where the famous Badaling section of the Great Wall located, The competitions, such as alpine skiing, bobsleigh, skeleton and luge race will be held in Yanqing; Zhangjiakou, a famous ski city about 180 kilometers northwest of Beijing, will host most of the skiing competitions, including freestyle skiing, snowboard, cross-country skiing, ski jumping, biathlon, and Nordic combined.

One of the highlights of this Winter Olympics is the “Green Olympics”. The preparations for the Winter Olympics have made full use of the legacy of the 2008 Olympic Games. The original venues have been given new missions through high-tech transformation and the Summer Olympics venues have been flexibly converted into Winter Olympics venues. For example, the National Aquatics Centre, known as the “Water Cube”, has been converted into an “Ice Cube” to undertake curling competitions during the Winter Olympics; The Beijing National Stadium, known as the “Bird’s Nest”, will once again host the opening and closing ceremonies of the Winter Olympics after 2008. The newly-built venues are also amazing. The National Speed Skating Oval, known as the “Ice Ribbon”, is one of the new venues for this Winter Olympics. And it is also the first speed skating arena in the history of the Winter Olympics that uses CO² (carbon dioxide) as a refrigerant.

With these Olympics, building dream in Beijing. The Olympic Winter Games Beijing 2022 will unite all people in the world. See you in Beijing in 2022.
