

70th Anniversary of the Nursery Service of the Women's General Association

Time flies! The Nursery under the Women's General Association of Macau is now celebrating its 70th anniversary.

Looking back at the early 1950s, the founders of the Association opened the first nursery in 1952 with the pioneering spirit of helping local women participate in social activities and reduce their pressure of caring for kids at home. Thanks to the selfless dedication and the hard work of several generations in the past 70 years, the Nursery under the Women's General Association has developed from a simple house with eight children into a Nursery of eight day care centres with excellent teachers, refined equipment, safety and hygiene. And the childcare services have been extended to families not only in Macao peninsula, but also those in Taipa and Coloane.

“Caring and Love” is the motto of the Nursery, which has been guiding each staff member to carefully nurture every child of the Nursery. From daily activities such as reading picture books, story times, and playing games, to life experiences such as nature activities, our children are nurtured from an early age to develop the Chinese traditional virtues such as benevolence, love, integrity and filial piety.

Owing to the development and needs of nursery service, the Nursery Parents Association of the Women's General Association of Macau was established in 1992. Its affiliate – the Nursery Elite Volunteer Team – consists of members that are nursery graduates in the past years. Through activities such as visits and trips to mountain areas and charity fund-raising events, their vision is broadened, and their concern and sense of responsibility for the society is also strengthened.

In the future, the Nursery under the Women's General Association will continue to advance with the times, and work hard to build our harmonious and happy families and write a new chapter in the cause of women and children in Macao!
